Abstract	5
1. Introduction	7
2. Types of ores from a historical perspective	9
3. Types of deposits and resources of iron ores	11
4. Ore mining and production of concentrates	17
5. Mining technologies	25
6. Transport	29
7. Metallurgical technologies and types of products	33
8. Production of pig iron, steel and cast iron	44
9. Demand and consumption of steel	52
10. Capacity utilization in steel industry	61
11. Production costs	67
12. Prices of ores and concentrates	74
13. Prices of steel and associated raw materials	81
14. Export, import of raw materials and products	89
15. Employment – work efficiency	99
16. Significance of iron raw materials in Poland economy	104
17. The market outlook	111
18. Current criteria used to qualify deposits for extraction	116
