Preface	7
Analysis of the current state of the resource base of primary energy sources and the potential of renewable energy sources for the Polish energy sector	9
<i>Tadeusz Olkuski</i>	
Abstract	9
1. Introduction	9
2. Hard coal.....	11
3. Lignite	14
4. Natural gas	16
5. Renewable energy sources	19
6. Conclusion	21
References	22
Third Party Access right as a key element of the liberalisation of the electricity market in Poland – past experience and present challenges	25
<i>Roman Warchol</i>	
Abstract	25
1. Introduction	25
2. Elements of the liberalisation of electricity markets	26
3. Developments in the legal environment	27
3.1. Directive 96/92/EC – beginnings of the liberalisation of the electricity market in Poland	27
3.2. Directive 2003/54/EC – intensification of the liberalisation processes in electricity markets	29
3.3. Directive 2009/72/EC and supplier switching procedure pursuant to IRiESD – the Grid Code	31
4. Summary	36
References	36
The level of competition on the global oil market	39
<i>Dominik Kryzia, Michał Kopacz, Katarzyna Kryzia</i>	
Abstract	39
1. Introduction	40
2. Measures of concentration.....	41
2.1. The concentration ratio CR	42
2.2. The measure of the number of entities with a certain minimum market share	42

2.3. The Herfindahl–Hirschman index	42
2.4. The Gini coefficient	43
2.5. The entropy measure	43
2.6. The Shannon–Wiener index	44
3. The obtained results	44
3.1. Resources	44
3.2. Production	46
3.3. Exports	48
3.4. Imports	49
3.5. Consumption	50
4. Conclusions	51
References	52

**Application of biological monitoring assessment
of the ecological status of degraded areas** 53

Małgorzata Śliwka, Mateusz Jakubiak

Abstract	53
1. Introduction	53
2. Biological methods for the assessment of air quality	55
3. Biological methods of water quality assessment	59
4. Biological methods for assessing the toxicity of bottom sediments and soils	61
5. Biodiversity – an important indicator of the environment state	63
6. Conclusions	65
References	66

Development of architecture in the context of sustainable development 69

Iwona Piebiak

Abstract	69
1. Introduction	69
2. “Building culture” in the context of sustainable development	70
3. Sustainable architecture	73
3.1. Sustainable architecture – definition	73
3.2. Architectural styles in sustainable architecture	74
3.3. Building materials and technologies	75
3.4. Environmental context. Building site surroundings	76
3.5. The functional layout. The interior of the building	76
3.6. The body of the building	77
4. Sustainable architecture in practice. Example analysis in terms of greenway solutions	77
4.1. Polish Aviation Museum, Cracow	77
4.2. Quattro Business Park, Cracow	79
5. Conclusions	81
References	82

Urban transit network timetabling problem in terms of sustainable urban transportation	85
<i>Katarzyna Zofia Gdowska, Roger Książek</i>	
Abstract	85
1. Introduction	86
2. Sustainable urban transport policy	87
3. City public transport system and its role in a sustainable city	90
4. Public transport system timetabling problem as a significant aspect of urban sustainable transportation planning	91
5. Transfer synchronization	94
6. Concluding remarks	95
References	96
