Summary	7
Streszczenie	9
Acknowledgements	11
Nomenclature	13
Introduction	15
1. Basic Theory and Application of Ejectors	19
1.1. Types of Ejectors	19
1.2. Single-Phase Ejector Theory	21
1.3. Two-Phase Ejector Theory	24
1.4. Ejector Irreversibility	29
1.5. Background of Ejector Application in Refrigeration Cycles	30
1.6. Final Notes	31
2. Classification of Ejector Refrigeration Cycles	32
2.1. Categories of Ejector Refrigeration Cycles	32
2.2. Category 1: Ejector on the Suction of a Compressor	33
2.3. Category 2: Ejector on the Discharge of a Compressor	35
2.4. Category 3: Ejector Replacing a Compressor	38
3. Category 1 Ejector Cycle for Air-Source Heat Pumps Operating in Northern Climate – a Feasibility Study	41
3.1. Problems and Challenges	41
3.2. Category 1 Cycle – Conceptual Designs and Investigations	46
4. Category 2 Cycle – Concept and Feasibility Study	52
4.1. Category 2 Cycle Development	52
4.2. Background of Two-Phase Flow	55
4.3. Description of the New Refrigeration Cycle (Category 2 Cycle)	57

4.4. Fabrication and Testing of Category 2 Cycle Prototype	65
4.5. Summary of Feasibility Study	76
5. Analysis of the Condensing Ejector for Category 2 Refrigeration Cycle	77
5.1. Theoretical Analysis of Condensing Ejectors	77
5.2. Multi-Dimensional CFD Analysis	83
5.3. Laboratory Experiments with Condensing Ejectors	90
5.4. Conclusions and Recommendations	94
6. Analysis of Category 2 Cycle with R-507 Refrigerant	96
6.1. Theoretical Analysis of a Compression System with High-Pressure Ejector	96
6.2. Test Facilities for Cycle Investigations	118
6.3. Experimental Investigations of Ejector I	125
6.4. Experimental Investigations of Category 2 Compression-Ejection System	133
6.5. Conclusions and Recommendations	146
7. Category 3 Cycle and Its Applications	148
7.1. Introduction and Technical Concept	148
7.2. Theoretical and Experimental Studies of Category 3 Cycle for Solar A/C	151
7.3. Determining Ejector Geometry	157
7.4. Approach to Cycle Analysis	160
7.5. Experimental Results	165
7.6. Conclusions and Recommendations	173
8. Commercial Potential of Category 3 Cycle for Air-Conditioning Purposes	175
8.1. Anticipated Benefits	175
8.2. Marketable Products	176
8.3. Market Assessment	180
8.4. Towards Successful Commercialization of Products Based on Category 3 Cycle	182
