<b>Streszczenie</b> .....	<b>ix</b>
<b>Summary</b> .....	<b>xi</b>
<b>1 Introduction</b> .....	<b>1</b>
1.1 Approaches to mobility management .....	4
1.2 Mobility in the Internet .....	5
1.3 Research on IP mobility management .....	5
1.4 Contribution .....	7
1.5 Organization of the text .....	10
<b>2 Architecture restrictions to support host mobility</b> .....	<b>13</b>
2.1 Topology control in communications systems .....	13
2.1.1 Identities, name spaces and names .....	14
2.1.2 Name lookup and name resolution .....	15
2.1.3 Path computation .....	16
2.1.4 Naming schemes .....	17
2.1.5 Routing in the ‘small world’ networks .....	20
2.1.6 Alternative approaches – compact routing .....	22
2.2 Internet architecture .....	23
2.2.1 Principles .....	24
2.2.2 Communication model .....	26
2.2.3 Address allocation schemes .....	29
2.3 Internet architecture restrictions to support mobility .....	31

<b>3</b>	<b>Requirements for mobility management system</b>	<b>37</b>
3.1	Architecture options to support mobility . . . . .	38
3.2	Handover management strategies . . . . .	39
3.2.1	Mobility management in the network layer . . . . .	40
3.2.2	Mobility management in the data-link layer . . . . .	41
3.2.3	Mobility management above the network layer . . . . .	42
3.3	Handover initiation and execution control . . . . .	42
3.4	Functional requirements . . . . .	43
3.5	Technical requirements . . . . .	45
3.6	Design considerations . . . . .	47
3.6.1	Host and endpoint identification . . . . .	47
3.6.2	Binding management . . . . .	47
3.6.3	Binding security . . . . .	48
3.6.4	Routing scalability . . . . .	49
3.6.5	Protocol interworking . . . . .	49
3.6.6	Cross-layer improvements . . . . .	50
3.6.7	Transport layer problem . . . . .	51
3.6.8	Movement anticipation and detection . . . . .	52
3.6.9	Systems interworking . . . . .	54
3.6.10	Application limitations . . . . .	55
3.6.11	Handover scope . . . . .	55
3.6.12	Technology heterogeneity . . . . .	56
3.6.13	Handover timing . . . . .	57
3.7	Factors in system design process . . . . .	57
3.8	Specification guidelines . . . . .	59
<b>4</b>	<b>Mobility management in 2G and 3G cellular systems</b>	<b>61</b>
4.1	Mobility management in GSM . . . . .	62
4.1.1	System architecture . . . . .	62
4.1.2	GPRS packet data service . . . . .	64
4.1.3	GPRS system architecture . . . . .	65
4.1.4	Mobility management . . . . .	70
4.1.5	Location management in standby mode . . . . .	73
4.2	Mobility management in UMTS . . . . .	74
4.2.1	System architecture . . . . .	74
4.2.2	Location management in GSM and UMTS . . . . .	78
4.2.3	Handover types . . . . .	82
4.2.4	Intra-RNS soft handover . . . . .	84
4.2.5	Inter-RNS soft handover . . . . .	86
4.2.6	Handover with SRNS relocation . . . . .	88

---

4.2.7	IPv6 address autoconfiguration . . . . .	90
4.2.8	IPv6 address autoconfiguration in UMTS . . . . .	91
4.2.9	Radio resource control in mobility management . . . . .	92
4.2.10	Handover with FMIPv6 control . . . . .	92
<b>5</b>	<b>Mobility management in the Internet</b>	<b>97</b>
5.1	Models for mobility management . . . . .	99
5.2	Schemes for global mobility management . . . . .	101
5.2.1	Host mobility with Mobile IPv4 protocol . . . . .	101
5.2.2	Host mobility with Mobile IPv6 protocol . . . . .	106
5.2.3	Comparative analysis of MIPv4 and MIPv6 . . . . .	110
5.2.4	Fast handovers in Mobile IPv6 protocol . . . . .	112
5.2.5	Host mobility with Hierarchical MIPv6 protocol . . . . .	116
5.3	Schemes for local mobility management . . . . .	118
5.3.1	Host mobility with Proxy MIPv6 protocol . . . . .	121
5.3.2	Fast Handovers for Proxy Mobile IPv6 . . . . .	126
5.4	Discussion . . . . .	128
<b>6</b>	<b>Security management in all-IP system</b>	<b>133</b>
6.1	Session model . . . . .	135
6.2	Handover control model . . . . .	136
6.3	Security model . . . . .	137
6.3.1	Administrative domain model . . . . .	138
6.3.2	Trust model . . . . .	139
6.3.3	Trust groups, trust levels and trust domains . . . . .	141
6.3.4	Federations . . . . .	142
6.3.5	Federations impact . . . . .	144
6.3.6	Secure group key management . . . . .	145
6.4	Discussion . . . . .	147
<b>7</b>	<b>Mobility management in LTE Evolved Packet System</b>	<b>151</b>
7.1	Mobility management system – an overview . . . . .	152
7.2	Architectures for 3GPP access systems . . . . .	156
7.3	Architectures for non-3GPP access systems . . . . .	157
7.3.1	Non-roaming architecture for non-3GPP systems . . . . .	158
7.3.2	Roaming architecture for non-3GPP systems . . . . .	159
7.4	Handover in the Evolved Packet System . . . . .	163
7.5	Emerging models and schemes . . . . .	165
7.5.1	Local offloading and mobility . . . . .	165
7.5.2	Distributed mobility management . . . . .	166

7.5.3	Host identity protocol . . . . .	167
7.5.4	Locator-identifier separation . . . . .	167
<b>8</b>	<b>Summary</b>	<b>169</b>
	<b>Bibliography</b>	<b>179</b>
