UKRAINIAN SUMMARY	11
ENGLISH SUMMARY	14
1. Introduction	17
2. Basic characteristics of the Transcarpathian territory	19
2.1. History of the formation of the Transcarpathian region.....	19
2.2. Location	20
2.3. Climate conditions	22
2.4. Water resources	24
2.5. Landscape characteristics	26
2.6. Population of Transcarpathia	27
2.7. General description of economy	28
2.8. Foreign economic and investment activity in the region	29
2.9. Tourism and recreation	30
Bibliography	31
3. Geological and hydrogeological conditions of geothermal waters occurrence in Transcarpathia	33
3.1. General characteristics	33
3.2. Transcarpathian deep tectonics	41
3.3. Hydrogeological conditions of geothermal water occurrence	46
3.4. Geothermal waters application	53
Bibliography	55
4. Temperature conditions of geothermal water	57
4.1. Geothermal zones	57
4.2. Natural earth heat flow	58
4.3. Geothermal energy resources	63
Bibliography	66

5. Methods of earth heat opening out	67
5.1. Geothermal waters reservoirs opening out	68
5.1.1. Single borehole system	69
5.1.2. Multiple-borehole systems	73
5.2. Geothermal energy reservoirs opening out by means of a borehole heat exchanger	77
5.3. Making geothermal heat of hot dry rocks available	79
5.4. Concepts of making heat available from salt domes	80
Bibliography	82
 6. Low-temperature geothermic energy and other heat sources	 83
6.1. Heat from rock mass	83
6.2. Heat from underground waters	92
6.3. Heat from surface waters	92
6.4. Atmospheric air	93
6.5. Ventilation air	93
6.6. Reverse heat in district heating systems	93
6.7. Utilisation of a central heating installation	94
6.8. Ice rinks – swimming pools	94
6.9. Heat from waste	95
6.10. Heat from infrastructural installations	95
6.11. Coherence of low-temperature heat sources	97
Bibliography	98
 7. Heat pumps	 99
7.1. Principle of operation	100
7.2. Structure of an air-compressor heat pump	103
7.3. Sources of low-temperature heat	104
7.3.1. Heat carrier	104
7.3.2. Low-temperature heat carrier vs. heat pump performance	106
7.3.3. Kinds of low-temperature heat sources	108
7.4. Heat consumers	110
7.4.1. Continuous heat supply systems	110
7.4.2. Cyclical heat supply systems	110
7.4.3. Continuous cooling and heat supply systems	111
7.4.4. Cyclical cooling and heat supply systems	111
7.4.5. Heating and heating/cooling systems with heat storage	112
7.5. Energy and economic efficiency of heat pumps	112
7.6. Investment costs	114
7.7. Operational costs	115
7.8. Formal issues regarding heat pump use	117
Bibliography	118

8. Opportunities of heat and geothermal water utilisation	119
8.1. Utilisation of geothermal heat	119
8.1.1. Cascade energy reception	120
8.1.2. Direct and indirect production of electricity	121
8.1.3. Direct heat utilisation	122
8.1.4. Indirect heat utilisation	127
8.1.5. Peak heating loads in geothermal heating plants	127
8.2. Possibilities of geothermal water utilisation	129
8.2.1. Recreation	129
8.2.2. Balneology	130
8.2.3. Minerals	130
8.2.4. Cosmetics	130
Bibliography	133
9. Technical and technological issues of geothermal energy management	136
9.1. Borehole injectivity loss	136
9.2. Corrosion of the deep seated and surface installation	138
9.3. Sediments precipitation and deposition	141
9.3.1. Secondary minerals in geothermal installations	143
9.3.2. Determination of precipitation tendencies of calcium carbonate and corrosivity by means of selected indexes	143
9.4. Bacterial micro-flora in geothermal waters	148
9.5. Monitoring of geothermal installations and geothermal waters	150
9.6. Application of solutions improving geothermal system operation	152
Bibliography	158
10. Selected issues regarding the adjustment of buildings in order to use low temperature heat	162
10.1. Energy assessment of buildings	163
10.2. Energy assessment in a public utility building (Ukraine)	164
10.3. Amendment of the directive	167
10.4. Passive building	168
10.5. Adjustment of buildings to utilise low-temperature heat	172
Bibliography	177
11. Normative and legal base of renewable energy support in Ukraine	178
11.1. Main legal acts upon which the legal documents on geothermal energy use are based	179
11.1.1. Subsoil Code of Ukraine	179
11.1.2. Law of Ukraine on Energy Saving	182
11.1.3. Law of Ukraine on Alternative Energy Sources	184

11.1.4. Water Code of Ukraine	185
11.1.5. Energy Strategy of Ukraine by 2030	186
11.1.6. Law of Ukraine on Local Governments in Ukraine	186
11.2. Legal acts concerning the classification of mineral resources, land and tax relations	186
11.3. Legal acts concerning the prospecting of the geothermal waters reservoirs	187
11.4. Legal acts concerning reservoirs drilling and geothermal water extraction	188
11.5. Legal acts concerning the use of geothermal waters	188
11.6. Legal acts regulating the environmental aspects concerning geothermal waters	189
11.9. Regional legal acts of the Transcarpathian region concerning the development of geothermal waters reservoirs	190
Bibliography	191
12. Planning geothermal waters management in the communes of Transcarpathian Oblast and social aspects	193
12.1. Significance of renewable energy sources in district development	193
12.2. Social aspect of geothermal energy utilisation	200
12.2.1. Public opinion in geothermal project areas	200
12.2.2. Social acceptance of geothermal projects	201
12.2.3. Planning of geothermal energy utilisation in Ukraine's Transcarpathia	203
Bibliography	204
13. Current status and future management of waters and geothermal energy in the Transcarpathian Region	205
13.1. Current management of geothermal waters in the Transcarpathian Region	205
13.1.1. Geothermal waters in Mukacheve	209
13.1.2. Geothermal waters in Berehove	213
13.1.3. Geothermal waters in Kosyno	223
13.2. Analysis of water utilisation	227
13.3. Proposal of activities in order to increase utilisation of geothermal waters and heat contained in them	227
13.3.1. Mukacheve	227
13.3.2. Berehove	230
13.4. Possibilities of heat and air conditioning supplies based on a heat pump	231
Bibliography	233

- 14. Economic evaluation of geothermal projects** 235
 - 14.1. Calculation of present value 236
 - 14.2. Net present value 236
 - 14.3. Risk in geothermal projects 237
 - 14.4. Sensitivity analysis 238
 - 14.5. List of costs and revenues sources 239
 - 14.6. Possibilities of improving economic factors 241
 - 14.7. Influence of the environment 242
 - 14.8. Licensed business activity in the area of heat production,
transmission and distribution in Poland 243
 - 14.8.1. Geothermal energy tariffs using the example
of PEC Geotermia Podhalańska SA 245
 - 14.8.2. Procedure of connecting new customers
to the geothermal network 249
 - Bibliography 253

- 15. Sources of financing Ukrainian investments relating
to the use of geothermal waters and energy** 255
 - 15.1. Policy of Ukraine towards development
of renewable energy, including geothermal energy 255
 - 15.2. Review of sources of financing investments in Ukraine,
with special emphasis on geothermal energy 256
 - 15.2.1. Financing structure 257
 - 15.2.2. Budget sources and own funds of local authorities 257
 - 15.2.3. Financial assistance provided by assistance programmes 259
 - Bibliography 270

- 16. Conclusions** 273
