

Contents

Major nomenclature	9
1. Introduction	11
1.1. Motivation	11
1.2. Significance of the Study	12
1.3. Objective of the thesis	12
1.4. Author's contribution	13
2. Pressurized Water Reactor	14
2.1. Introduction	14
2.2. The PWR plant	14
2.3. Reactor internals	16
2.3.1. Reactor pressure vessel	17
2.3.2. Reactor barrel	18
2.3.3. Baffle	19
2.3.4. Lower internals	20
2.3.5. Upper internals	20
2.3.6. Neutron reflector	20
2.4. Reactivity control	21
2.5. Reactor core	23
2.5.1. Fuel sub-assemblies	24
2.5.2. Fuel pins	27
2.5.3. The PWR fuel	29
2.5.4. Rod clusters control assembly	31
2.5.5. Burnable poison	33
2.6. The PWR in-core fuel management	35
2.6.1. Initial core loading pattern	37
2.6.2. Some alternate core refuelling patterns	39
2.7. Water chemistry	39
3. Monte Carlo modelling of reactor physics	41
3.1. Introduction	41

3.2. The MCB code	42
3.2.1. Program flow chart	43
3.2.2. Definition of transmutation system	43
3.3. Nuclear data libraries	45
3.3.1. The Joint Evaluated Fission and Fusion libraries	45
3.3.2. The ENDF format	47
3.3.3. The nuclear data libraries of the MCB system	47
3.4. Monte Carlo modelling of neutron transport	48
3.4.1. Random sampling	50
3.4.2. Physics of interactions	52
3.4.3. Geometry	57
3.4.4. Tallies	60
3.4.5. Monte Carlo statistics	63
3.4.6. Eigenvalue calculations	66
3.5. Burnup calculations	68
3.5.1. The general burnup equation	69
3.5.2. Theoretical background of the Transmutation Trajectory Analysis	70
4. Validation	77
4.1. Introduction	77
4.1.1. Burnup validation	79
4.1.2. Related benchmarks and activities	81
4.1.3. Methodology	82
4.2. Benchmark verification	84
4.2.1. Irradiation history	85
4.2.2. Analytical methods	89
4.2.3. Experimental results	93
4.3. Numerical model	96
4.3.1. Model geometry	96
4.3.2. Material composition	99
4.3.3. System normalization	103
4.4. System characteristics	105
4.4.1. Infinite neutron multiplication factor	105
4.4.2. Burnup	108
4.4.3. Power evolution	110
4.4.4. Fuel	114
4.4.5. Absorbers	118
4.5. Comparative analysis	130
4.5.1. Comparison with other validation studies	133
4.5.2. Detailed comparison	137
4.5.3. Main comparison	158

5. Conclusions	161
5.1. Summary	161
5.2. Conclusions	164
5.3. Recommendations for future work	164
Abstract	167
Streszczenie	169
References	171
