

Contents

Preface	5
1. Instrumentation Fundamentals: Errors, Units, and Standards	7
2. Indicating Instruments	13
2.1. Permanent magnet moving coil movement (PMMC) (ustrój magnetoelektryczny)	13
2.2. Iron vane movement	16
2.3. Electrodynamicometer movement	18
2.4. Digital instruments	20
3. Direct Measurements of Basic Parameters	23
3.1. Resistance measurement	23
3.2. Power measurement	25
3.3. Three voltmeters method	26
4. DC Bridges and Potentiometers (kompensatory)	28
4.1. Wheatstone bridge	28
4.2. Double Kelvin bridge	30
4.3. DC potentiometers	31
5. AC Bridges	34
5.1. Maxwell inductance bridge	36
5.2. Wien capacitance bridge	38
5.3. Robinson bridge	39
5.4. Schering bridge	40
6. The Oscilloscope (CRO – Cathode-Ray-Oscilloscope)	42
6.1. Frequency and phase measurement using Lissajoux patterns	44
6.2. Characteristic tracing (kreślenie)	47
7. Polyphase Power Measurements	48
7.1. Power measurement in three-phase, four-wires system	49
7.2. Power measurement in three-phase, three-wires system	50
7.3. Instrument transformers	52

8. Transducers as Input Elements to Instrumentation Systems	54
8.1. Strain gauges	55
8.2. LVDT – Linear Variable Differential Transformer	57
8.3. Capacitance transducers	58
8.4. Resistance temperature detectors (RTD)	60
8.5. Thermocouples	61
9. Mechanical Transducers	65
9.1. Pressure transducer	65
9.2. Force and torque (moment) transducers	67
9.3. Acceleration transducer	69
10. Transducer Interfacing	73
11. Instrument Amplifiers	79
12. Carrier Frequency Amplifiers	84
12.1. AC Amplifier	88
12.2. Synchronous demodulator	90
12.3. Output filter	92
13. Active Filters	93
14. Oscillators	101
14.1. Linear oscillators	101
14.2. Nonlinear oscillators	106
15. Frequency Modulation Systems	109
15.1. Voltage to frequency converter	110
15.2. Direct parameter to frequency converter	112
15.3. Frequency to voltage converters	114
16. Analogue to Digital Converters (A/D)	117
16.1. Flash A/D converter	119
16.2. Successive approximation type A/D converter	121
17. Analogue Signal Processing	123
17.1. Addition and subtraction	123
17.2. Multiplication and division	124
17.3. Integration and differentiation	129
18. Integrated Transducers	133
18.1. Temperature transducer AD590	134
18.2. Pressure transducer MPX5000	136
18.3. Accelerometer ADXL05	136
19. Appendix	140
